

BA in Sustainable Urbanism

The progressive urbanisation of the world's population has multiple implications that range from the social to the ecological. There is a clear need for a cadre of well-trained and thoughtful practitioners to respond to the urban challenge in India and beyond. Growing opportunities are available to graduates in municipalities, the civil society, and consultancies in areas like waste management, housing, transportation, and climate-resilience. Join in to help shape the agenda in the urban century.

Key Features

- Grounding in liberal arts and language competency
- Domain knowledge through coursework in the governance, technologies and ecology of urbanisation
- Acquisition of analytical skills with the use of statistical, mapping and visualisation tools
- Training in fieldwork—within and outside Delhi—and interface with urban practice as part of studio projects and core coursework
- Freedom to choose from a range of elective courses
- Possibility of changing BA major after one year

Admissions Open

Deadline: 5 July, 2018
